Talisay City, Cebu, Philippines

PROFESSIONAL SUMMARY

Detail-oriented and adaptive Computer Science student at the University of the Philippines Cebu with professional experience spanning software development, operations automation, and immersive technology. Currently an Operations Associate and Automation Specialist at Belli, systemizing air-cargo and supply-chain workflows; previously an Operations Manager at VERGE Inc and an Immersive Technology and 3D Optimization Intern at ISCOLab (UPOU). Skilled in full-stack and game development, UI/UX design, prototyping, and 3D asset optimization, with a track record of building efficient tools, meeting deadlines, and applying critical thinking to complex problems.

Beyond technical work, experienced in organizational leadership and external relations through partnership management with the UP Computer Science Guild, cross-cultural collaboration, and representing organizations in professional and inter-university settings. Recognized for strong communication, teamwork, and public-relations skills, with the ability to balance innovation and resourcefulness across technical and organizational responsibilities.

WORK EXPERIENCE

Operations Associate & Automation Specialist

Belli | 2026 – Present

- Streamlined and automated air-cargo operations workflows, applying technical problem-solving to systemize supply-chain logistics.
- Oversaw back-end administrative processes, workflow automation, and digital strategy execution to improve operational efficiency.
- Completed intensive international onboarding training in Singapore focused on scalable operational systems and workflow optimization.

Operations Manager & Automation Specialist

VERGE Inc, Watertown, South Dakota (Remote) | July 2024 – January 2026

- **Operations & HR:** Oversaw back-end operations, workflow automation, and human resources administration.
- **Sales & Marketing:** Drove digital growth and lead generation using SEO and digital marketing strategies.
- **Technical Development:** Built automated internal tools using Visual Basic and website-builder platforms.

Key Skills: SEO · Digital Strategy · Visual Basic · Website Builders · Back-end Operations · HR · Sales & Marketing

INTERNSHIP

Immersive Technology & 3D Optimization Intern

ISCOLab, University of the Philippines Open University | 2026

- Developed **BinItBetter**, a gamified VR sustainability application set in the UP OUverse to promote proper waste segregation.
- Created individual spatial-computing and immersive-technology prototypes aligned with the UN Sustainable Development Goals (SDGs).
- Performed 3D asset optimization (mesh, materials, and LOD modeling) using Blender and Unity for spatial-computing environments.

EDUCATION

Bachelor of Science in Computer Science

University of the Philippines Cebu, Cebu City | 2023 – Expected 2027

- College Scholar
- DOST-SEI S&T Undergraduate Scholarship (2023), Department of Science and Technology

TECHNICAL SKILLS

- **Full-Stack & Web Development:** React, React Native, Next.js, Vite, Flutter, Flet, Tailwind CSS, HTML5, CSS3
- **Backend & Databases:** Supabase, Prisma, PostgreSQL, SQLAlchemy
- **Game Development:** Unity, Godot Engine
- **3D Tools:** Blender (LOD modeling, mesh optimization, material design, animation, game assets), Three.js

- **Programming Languages:** TypeScript, JavaScript, Python, C, C++, C#, LaTeX
- **Data & ML:** Pandas, Scikit-learn, SQLAlchemy
- **Design & Prototyping:** Figma (UI/UX wireframing), Canva
- **Automation, Data & Productivity:** Visual Basic, SEO, Digital Strategy, Google Workspace, workflow automation, email management, scheduling, technical documentation

PROJECTS

GreenPoint: GIS-Based Framework for Greening Interventions
Type: Research & Innovation (ongoing) | Co-Creator | Selected Finalist: PJDSC 2025, PhilSA 2025, Aboitiz Innovate Cebu 2026 · Champion: Software Engineering Project Expo 2026

- Co-developing a GIS-based application that analyzes Urban Heat Island (UHI) effects and delivers AI-driven greening recommendations to mitigate urban climate impacts.
- Led the initial design-thinking phase, driving urban environmental research, spatial-data ideation, and technical-paper development pitched across major data science and innovation circuits.

Oki Ventures: Home Services Booking & Management System
Type: Startup Web Platform (ongoing) | Co-Creator & Full-Stack Developer

- Developing a web-based booking and management system for home services, bridging clients and service employees.

IBiz: Smart Business Planning Platform for Women Entrepreneurs
Type: Hackathon (IBPAP 2025) | Co-Creator | July 2025

- Built a web app with React + Vite (TailwindCSS, HTML, JavaScript) to help women entrepreneurs refine ideas, generate feasibility reports, and create business plans.
- Integrated startup guides and a community space for networking and resource sharing.

PWDIndependence: Emergency App for Persons with Disabilities
Type: Hackathon (Komsai Week 2025) | Co-Creator | March 2025

- Built a distress-signal app featuring one-button emergency alerts, real-time location tracking, emergency contact notifications, and medical-info access.
- Developed with Python, Flet, SQLAlchemy, Pandas, and Scikit-learn (DBSCAN).

UNTREAD: 2D Game
Type: Game Jam (UPCSG GameJam 2026) | Game Developer

- Co-created a 2D game in Godot around the theme “The Path Less Taken” within a limited hackathon timeframe.

Hamuketsu: Comedy-Driven 2D Mobile Game
Type: Game Project | Co-Creator | June 2025

- Developed a comedy-driven 2D browser game with HTML, JavaScript, and CSS featuring pixel-art visuals and themed minigames.
- Implemented Finite State Machines (FSMs) to manage branching choices, puzzles, and escalating difficulty; designed expressive animations and comedic gameplay.

FabLearn XR: Semiconductor Learning Prototype
Type: 3D Web / Educational Project | 3D Web Developer

- Built an interactive, lightweight 3D educational demo using Three.js (via CDN), HTML5, and JavaScript featuring step-by-step learning modules and quizzes.

COOKBOOk: Recipe App
Type: Academic Project (Data Structures) | Co-Creator | Nov – Dec 2024

- Built an app that suggests recipes from available ingredients using a pantry system (Python, Flet).
- Used Trie, Hash Tables, Scapegoat Trees, Linked Lists, and Dictionaries for efficient storage and retrieval; NLTK for ingredient lemmatization.

Split: Collaborative Expense Management
Type: Academic Project (Software Engineering) | Web Engineering Project

- Built a collaborative expense-management application with interactive tracking cards and offline synchronization.

Kanban Board: Task Management
Type: Academic Project (Software Engineering) | Web Engineering Project

- Developed a dynamic task-management web application with drag-and-drop workflow tracking and a responsive UI.

VOLUNTEER & COMMUNITY EXPERIENCE

Event Volunteer: AWS Student Community Day Cebu 2026 (Built to Build)
Amazon Web Services | UP Cebu Performing Arts Hall | August 2026

- Assisted in event operations, stage logistics, and audience facilitation at the UP Cebu Performing Arts Hall.
- Supported a regional gathering of student builders, industry speakers, and cloud practitioners focused on cloud computing innovation.

Participant & App Designer: UTokyo Virtual Exchange Program (CALL)
UPOU · UP Cebu · University of Tokyo | April – July 2026

- Collaborated with cross-cultural teams to design Computer-Assisted Language Learning (CALL) application proposals.
- Applied pedagogical theories and user-centered design principles to build technology-driven language-learning solutions.

Event Volunteer: AWS Community Day Cebu 2025
University of the Philippines Cebu | September 2025

- Supported event operations and facilitation for the 2025 AWS Community Day held at UP Cebu.

Event Volunteer & Organizer: QISTCon.ph 2025 – Quantum Information, Science & Technology Conference
Jpark Island Resort and Waterpark, Cebu | July 30 – August 1, 2025

- Volunteered in event organization and operations for the Philippine quantum information, science, and technology conference, supporting speakers, participants, and event flow.

LEADERSHIP & ORGANIZATIONS

- **Partnerships & Linkages Director**, UP Computer Science Guild (UPCSG) | 2025 – 2026 — manages external partnerships, linkages, and sponsorships on behalf of the guild
- **Partnerships & Linkages Deputy**, UPCSG | 2024 – 2025
- **Technical Head**, UPCSG TekToks | 2023
- **InterHigh Programming Competition Mentor**, UPCSG Komsai Week | 2025
- **Partnerships & Sponsorships Co-Head**, UPCSG Komsai Week | 2025
- **Representative**, Cebu Student Programmer's Association (CESPA) | 2025 – 2026

TRAININGS, SEMINARS & CERTIFICATIONS

- **Immersive Making: Art, Design, and Communication in VR/XR** — MANGO Workshop | 2026
- **Panel on Research Ethics: Navigating Human Research** — Certificate Module | 2026
- **DevFest Cebu 2025** — Golden Peak Hotel and Suites | November 30, 2025
- **AWS Mini Meetup** — University of the Philippines Cebu | September 14, 2025
- **Cipher Cebu: Modern Cryptography Workshop 0** — UP Cebu | September 10, 2025
- **PBA-X: Introduction to Blockchain and Polkadot** — Polkadot Blockchain Academy | July 25, 2025
- **Notion Cebu PH: Lead Forward Year 2** — University of San Jose-Recoletos | May 18, 2025
